How to generate this report

This report is generated after selecting values for the mandatory prompts. All mandatory prompts must have values selected before the Run Icon can be used to generate the report. Mandatory prompts can be identified as mandatory by the exclamation mark inside of the yellow-orange triangle, the square with the checkmark, or the display of (Mandatory). Detailed instructions for interaction with each prompt can be found on the OSC website at <https://www.osc.nc.gov/documents/files/web-intelligence-prompts>.

The Mandatory prompts for this report are:

- Organizational Unit
- CalMonth/Year (Single Value/Interval, Mandatory)

This report can also be further limited by utilizing the Optional prompts to further limiting the amount of data that retrieved into the body of the report. Optional prompts are indicated as optional in parentheses beside the prompt.

The Optional prompts are:

- Personnel Area(s) - (Optional)
- Job Family(s) - (Optional)
- Job Branch(s) - (Optional)
- Job(s) - (Optional)
- Position(s) - (Optional)
- Employee Group(s) - (Optional)
- Employee Subgroup(s) - (Optional)
- Employee(s) PersNo. - (Optional)

NOTE: Since we have a large number of positions in the system, using only the single wildcard character (*) can be very slow and may result in an error if the search exceeds the system limit. If this happens, you can narrow down your search by using the wildcard with specific text strings such as

Deputy*

Analyst

Admin*

If you know the position number, it is best to use the manual entry field (in step 6) to enter your selection.

Exclusion prompts exclude specified data by default while allowing customers the flexibility of changing them when necessary. Exclusion prompts are identified by the term Exclude followed by the prompt.

The Exclusion prompts are:

- Exclude Employee Group (Temps)
- Exclude Employee Subgroup (Temps)
- Exclude Action Type/Action Reason (Reorg Transfers)

NOTE: The Employee Group and the Employee Subgroup exclusions work together as a set to exclude temporary employees. If you want to clear the Temp exclusion, both exclusions (EE Group and EE Subgroup) must be cleared.

The screenshot shows a software interface with a search bar on the left and a main panel on the right. The search bar contains the text "Search". The main panel is titled "Prompts" and has a sub-header "Organizational Unit". Below this, there is a search bar with the text "Search". A dropdown menu is open, showing "Dependencies (0/1)" and "CalMonth/Year (Single Value/Interval, Mandatory)". Below the dropdown, there is a message box that says "Fill the dependencies above to get the list of values". At the bottom of the interface, there are buttons for "Run" and "Cancel".

Special Report Considerations/Features

- The Compa Ratio is calculated based on the job of the employee's organizational assignment as of the effective date of the separation, except for ZF Action type separations. For ZF action types, the job of the employee's organizational assignment as of one day prior to the separation effective date is used for the Compa Ratio calculation.
- The Compa ratio is calculated by dividing the FTE annual salary as of the separation date by the employee or job reference salary. The job reference salary is used in the calculation for banded jobs, and the employee reference salary is used for non-banded jobs. The Compa Ratio will not be calculated for an employee if the employee reference salary or the job reference salary does not exist.
- ZG/04 (Separation/Did Not Report) and ZG/26 (Separation/Cancel Sep Pay Continuation) actions are excluded.
- Temporary employees are excluded by default, but this can be changed.
- Reorg Transfer actions are excluded by default, but this can be changed.
- Since the BEACON system only captures incoming Agency Transfer actions (Z8), the X8 - Transfer Out (BI) action was created (only in BI) to assist in Turnover reporting. This X8 action is a copy of the original Z8 action but is instead assigned to the Agency that lost the employee from the transfer action.
- There is an Input Control available to assist in filtering by Separation Category. This may be needed to validate the various Separation counts on the 'B0042: Employee Turnover' report. Interaction with this Input Control will alter the report detail to reflect only the categories you have selected. The yellow Total line will also reflect the totaling appropriate to your selection.
