

CAT2 COMP BALANCE CHECK

WHEN RECORDING ADVERSE WEATHER LEAVE

JOB AID TM-43

The purpose of this job aid is to explain the CAT2 Comp Balance Check and how it will work when adverse weather is recorded.

With the changes to the Adverse Weather policy effective 1/1/2015, an employee is **not** allowed to use Adverse Weather Leave **if** the employee has available Comp Leave.

A validation in the CAT2 will prevent a Time Admin from keying Adverse Weather Leave (A/A 9545) in the timesheet if there is an available balance in any of the Comp Leave quotas for the requesting employee. The validation considers current balances and also takes into account any Approved Leave keyed prior to the A/A 9545 entry on the timesheet.

Examples

If an employee has Comp Balances to cover the amount of Adverse Weather leave keyed, the following error will generate, and the entry should be changed to Approved Leave (A/A 9000).

The screenshot shows a 'Data Entry Area' table with columns for days of the week (SU, MO, TU, WE, TH, FR, SA) and their corresponding hours. A green 'Display Messages' dialog box is overlaid on the table. The message table has columns for Date, Status, Type, and Error Message. The error message states: 'Comp balance(s) available for . A/A 9000 should be recorded inst'.

Keep in mind that the **entire** error message text **will not** display for the two errors in the initial pop-up window. Only a portion of the message will display. By double clicking on the message itself, the full text will be displayed in a separate pop-up window as shown below.

NOTE: Please note that employees keying time in ESS will be presented the same errors and warnings.
